DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-12 and 24-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is indefinite since "the linear axis" on line 5 lacks proper antecedent basis. Claim 24 is indefinite since "the blade" on line 7 and "the longitudinal axis" on lines 8 and 9 lacks proper antecedent basis.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,315,184. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the present claim 1 claims that the jaws are not rotatable relative to one another, whereas claim 1 of the patent claims that the jaws move perpendicular to the shaft axis. Both claims reflect that the jaws move in a parallel, non-rotatable fashion relative to one another. To eliminate the limitation of the movement being perpendicular to the shaft axis to allow for misalignment would have been obvious to one skilled in the art since such an omission does not materially effect the operation of the device.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17, 23-26 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuramoto et al.

Kuramoto et al. discloses the claimed invention including a first and second jaw 117, 118 linearly movable relative to each other between open and closed positions, by a rotatable shaft, or knob (not shown) (note: column 14, lines 14-35), a staple driver 33 and linear blade 106 (note Fig. 18) driven by a rotatable shaft, or lever 8.

Claims 15-17, 20 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Becht.

Becht discloses the invention as claimed including rotatable shafts for approximating jaws 4, 7 and for driving a blade and staple drivers, wherein the blade 13 moves "linearly" as broadly interpreted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuramoto et al. or Becht in view of Hooven.

Kuramoto et al. and Becht lack the motorized shafts. Hooven discloses a motorized shaft 61 for effecting the stapling and approximation of stapler jaws. In view of the teachings of Hooven, it would have been obvious to one skilled in the art to motorize the operation of the rotatable shafts of Kuramoto et al. or Becht in order to provide a more effective and quicker mode of operation.

Allowable Subject Matter

Claims 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 27 and 28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusi n

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Strekopytov et al., Yoon and Adams et al. disclose similar devices.
